**From:** Dr. Merinstein  
**To:** Dr. Lisa Cuddy  
**Subject:** Jessica Boyd

--

Dear Dr. Cuddy,

as discussed earlier ~~you are going to find you are going to find~~ a summary of the patient information about Jessica Boyd in the following.

**Patient's notes:**

*Name:* Jessica Boyd

*Sex:* female

*Age:* 16

*Marital status:* single

*Occupation:* student

*Present complaints:* feels dizzy after workout, passed out twice during the past two weeks, right knee pain due to excessive sports

*ENT:* no complaints, might have eroded dental enamel -> dentist council

*RS:* no breathing difficulties/ signs of asthma

*CVS:* heart racing, skipping beats (especially after workout)

*GIS:* nor regular meals (skipping breakfast, reduced diet in order to lose weight), lost 10 pounds during the last couple of weeks, self induced vomiting after overeating, fear of gaining weight,

*GUS:* amenorrhea over the past three months, had unprotected sexual activity

*CNS:* no complaints

*Immediate past history:* doesn't want her dad to know about her boyfriend and sexual activity, got a tongue piercing, no known abuse of substances/alcohol, nonsmoker, excessive exercise

***Diagnosis:***

amenorrhea due to weight loss;  
indications suggesting anorexia nervosa/bulimia nervosa at an early stage;  
suspected osteoporosis

***Treatment plan:***

- Suspected eating disorder:
  - consider cognitive-behavioral therapy/ family therapy and nutrition advice;
  - engaging and involving the family is necessary;
  - phosphorus, magnesium, electrolyte levels and renal function should be followed closely via blood tests
- Right knee pain:
  - do a CT/X-ray;
  - suspected osteoporosis can be treated with calcium and vitamin B supplements
- Sexual activity:
  - advice regarding contraceptive methods;
  - pregnancy test;
  - might want to consider consulting a gynecologist in the future
- Dental care:
  - check for eroded dental enamel due to acidic gastric contents;
  - check side effects of the tongue piercing;
  - check salivary glands

I would be very pleased if you were so kind to keep me informed about any performed procedures. Of course you can contact me any time, either via email or telephone. I would also like Jessica to come in for follow-up testing and regular check-ups.

Best wishes and thank you in advance,

Dr. Merinstein

## ~~2.2. COMMENTS:~~

~~Right-click on the text and hit “comment” to put in a comment. Be sure to put your name in brackets!~~

## ~~3. Your text:~~

### ~~Situation:~~

~~You are Dr. Merinstein, Jessica’s treating physician. As you are just about to leave for a four-week vacation, you want to make sure that your holiday replacement, Dr. Lisa Cuddy, is aware of Jessica’s situation as she will most likely be one of her first key patients.~~

### ~~Objective:~~

~~Write an email (300-400 words max.) to Dr. Lisa Cuddy in which you introduce the patient, describe the presenting symptoms (complaints), provide a diagnosis and recommend a treatment plan for her. Be factual and unbiased in your professional judgement.~~

- ~~• Style: It is a business email.~~

~~Time: 45 minutes.~~
